**BUILDING PRODUCTS DEVELOPMENT, INC. ACHIEVES
UNDERWRITER'S LABORATORY (UL) RATING ON FIXED CLIPS**

Edmond, OK – Building Products Development (BPD), a metal roofing design and testing company, recently focused their efforts on standing seam fixed and floating clips. BPD has now moved to the forefront of clip suppliers by achieving the Underwriter's Laboratory (UL) rating on their fixed clips for a variety of panel profiles.

Dale Altizer, President of BPD, stated: "This achievement gives us the highest level of validation for the quality and design of our clips. We have received great interest from our current and prospective customers regarding the availability of UL rated fixed clips for the different profiles. We are pleased to be in a position to meet the demand for these products."

By achieving the UL rating for construction numbers 90, 180, 298 and 298A, BPD is able to furnish fixed clips for most field rollformers in addition to their full line of UL rated floating clips.

By integrating these high-quality clips into standing seam roof systems, our customers will be assured of meeting the credentials required by specifiers. These clips can easily be incorporated into just about any standing seam roof for commercial, industrial and residential buildings. Clips are available for most 2" mechanically seamed, field or factory rollformed panels.

###

Building Products Development, Inc. is dedicated to providing the most state-of-the-art products for the metal construction industry. They design, test and produce standing seam clips that can easily be adapted to fit nearly any standing seam profile. The management team at BPD combines over 70 years of industry experience to ensure top-of-the-line services and products.
